

Community Connect Programme on Environmental Awareness at The Aryans School, Kolkata

May 9, 2014

A Community Connect programme on Environmental Awareness was organized on 9th May 2014 at **The Aryans School**, Kolkata by the 'Community Connect and Environmental Awareness Club' of Narula Institute of Technology- "Student Life Centre" (SLC) in association with the "Narula Institute of Technology forming American Society of Civil Engineers International Students Group" and "Institution of Civil Engineers Narula Institute of Technology- Student Chapter".

At the beginning Prof. Rudraprasad Bhattacharyya, faculty advisor of the club, addresses the audience and briefly outlined the need for such awareness programme (Photo 1). The audience was mainly students of class ninth and tenth standard (Photo 2). The introductory session was followed by a power point presentation is by Mr. Anindya Chowdhury, student member of SLC (Photo 3). Mr. Chowdhury presented several burning issues of our country like traffic congestion, global warming, solid waste management, remedy for chocking of drainage system, drinking water and energy crisis with increasing population and pollution. Moreover, different environmental problems of our society were highlighted and appropriate engineering solutions to them were also be discussed. Some tips were given to the young students of the school regarding modification of their behavioural patterns to avoid the above mentioned issues and look for a happy, durable and sustainable future.

This programme was aimed at students' awareness not only about the problems of our society but for the solutions too. An appeal had been made to these students to cooperate with civil engineers; as today's students are responsible citizen of future for building a better world.
